

Closed System Foley Catheter Usage

based on catheter days

RECOMMENDATION

Based on the Closed System Foley Catheter Usage graph, you have provided us with Pre- and Post- program catheter usage data from your facility, so your report complete.

- **Recommendation:** Congratulations! You have reduced your Closed System Foley Catheter Usage and increased your sustainability on the program. We hope you will share this usage reduction with your Leadership Team to further validate your decision to convert to the ERASE CAUTI program.
- **Deliverable:** If you would need any further assistance with the program, please contact your Program Manager, Lisa Marsek.
