

Based on the Nurse Test Scores graph, staff has not completed the **education**.

- a. **Recommendation:** To fully experience the effectiveness of the program, we recommend that your staff completes the education.
- b. **Deliverable:** Contact Dawn Crowther when you expect to complete the education. Once staff completes the education, we will update this report with the roster and your Medline rep will deliver a new report.

Your facility has likely experienced significant results with Medline's VAPprevent Program, and we would like to help you organize those results. To see your complete report, please provide the missing data to your rep or your Program Manager. We look forward to continuing to work with you on preventing/reducing incidences of ventilator-associated pneumonia at your facility.

Thank you for the opportunity to work with Facility Hospital to improve patient care and reduce costs. Please contact your program manager with any questions.
